### **DETAILED ACTION**

It has become apparent based on submitted references, additional searching, and the subject matter of the claims, that certain claims will be properly examined only if art containing divergent subject matter is thoroughly searched. Therefore, it has been determined that the following restriction is appropriate in order to ensure that all claims are thoroughly examined in the proper art technology area.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5, 7, 12, 14-17, 24-27, 33-49 drawn to a chip scale package with housing/window classified in class 257, subclass 678+.
- II. Claims 8-11, 18-23, 28-32, 50-62, 64-68 drawn to a chip scale package in a housing with an optical fiber/ferrule classified in class 385, subclass 92.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as various integrated circuits that do not use ferrule/fiber apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2877

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

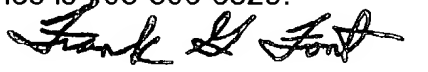

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Mooney whose telephone number is 703-308-6125. The examiner can normally be reached during weekdays, M-F.
